

CSIMQ, Issue 28

Call for Papers

Submission deadline: October 31, 2021

Submission site: <https://csimq-journals.rtu.lv/about/submissions#onlineSubmissions>

CSIMQ is an **Open Access** journal that publishes peer-reviewed original research articles reporting on studies of the structure, algorithms, behavior, and interactions of natural, social, socio-technical, and artificial systems that store, process, access, and communicate information. It concerns data, information, and knowledge fundamentals, models, and management from the points of view of their discovery, engineering, and application.

The papers shall address the topics of the following areas:

Social, Socio-technical, Organization and Business Informatics, which includes but is not limited to

- Social Systems Informatics
- Socio-technical Systems Informatics
- Organization Informatics
- Business Informatics
- Natural Systems Informatics
- Artificial Systems Informatics

High Complexity Information Systems Engineering, which includes but is not limited to

- Intelligent Systems Engineering
- Complex Systems Modeling and Software Development
- Adaptive and Adaptable Information Systems Engineering
- Networked Systems Engineering
- Emergent and Virtual Systems Engineering

Data and Knowledge Analytics, which includes but is not limited to

- Data Intensive Computing
- Semantic Data Analysis and Management
- Big Data Analytics
- Knowledge Analytics
- Business Analytics
- Social Networks Analytics

Supercomputing, which includes but is not limited to

- High Performance Computing
- High Throughput Computing
- Grid Computing
- Cloud Computing
- Supercomputing for Engineering Applications
- Mathematical and Analytical Methods for Scientific Computing
- Supercomputing for Social Systems

The main principles of the journal are the following:

- Usefulness and relevance of papers
- Comfort for authors and readers
- Flexibility in publishing

The journal is free of charge, i.e., **no fees** are charged for manuscript processing and publishing and article download. Each submitted article (before the start of the peer review process) is first processed by plagiarism control system and goes through the initial quality checking.
