2ND NEWSLETTER

NEW KEYNOTE SPEAKER

TIM BERNERS-LEE invented the World Wide Web in 1989. He founded and Directs the World Wide Consortium (W3C) the forum for technical development of the Web. He founded the Web Foundation whose mission is that the WWW serves Humanity, and co-founded the Open Data Institute in London. His research group at MIT's Computer Science and AI Lab ("CSAIL") plans to re-decentralize the Web. Tim spends a lot of time fighting for rights such as privacy, freedom and openness of the Web.

CO-LOCATED EVENTS

6TH DIGITAL HEALTH CONFERENCE (DH2016)

>> The opportunities for interdisciplinary digital health research bringing together computer science to dramatically improve health and wellbeing of individuals and populations are extraordinary.

THE 13TH WEB FOR ALL CONFERENCE: EDUCATION FOR ALL ON THE WEB

>> MOOCs, Big Data, and Open Content are changing how we look at education, broadening access to learning for millions, soon billions of individuals, and creating new opportunities to remove barriers to literacy, education, and the search for knowledge.

ENTREPRENEURS TRACK

>> Startup companies are a distinctive and foundational aspect of Web Industry. The Entrepreneurs Track brings together the main actors of the process that leads from research, technical, and business ideas to successful startup companies.
