

An abstract graphic on the left side of the slide, consisting of a network of white lines and small circles on a blue gradient background. The lines are vertical and horizontal, with some diagonal connections, and the circles are placed at various points along these lines, resembling a circuit board or a data network.

# HTML 5

# HTML 5 GOALS

- Tim Berners Lee
  - Incremental development.
  - Compatibility
  - Cooperate with relevant stakeholders
- W3C
  - **Compatibility** (Think of making changes twice, relevancy, pull-effect), also consider „small“ markets
  - **Utility** (solve „real“ problems, main problems, focus on users)
  - Separation of content and presentation
  - **Universal access** (e.g. viewport), Unicode
  - **Accessibility** (e.g. alternate text)

# HISTORY

- Created in 1991 by Tim Berners Lee (CERN)
- Originally 18 elements
- HTML 2:
  - 1995 (RFC 1866)
  - MIME-Type = text/html
  - Proper display of information

## • HTML 4

- Published in December 1997
  - Strict / Transitional / Frameset versions
  - Many new attributes and elements
  - Stylesheets, separation of structure and presentation
  - After change in DTD → HTML 4.01
  - Introduction of Unicode
  - Frames, scripts, events (onmouseover(), etc.
- 
- 

# WHATWG VS HTMLWG

- Web had changed (document sharing less important)
- Clean code is less important than keep things running

WHATWG (HTML)	W3C's HTMLWG (XHTML)
Display differently on different browsers	More compatible (flawless code)
Much more error tolerant	Query with XPath
More practical	Conversion to other formats much easier

# HTML 5 ARCHITECTURE

- Doctype declaration (DTD and version information)
- Head (Metadata e.g. <title>, <style>, <script>)
- Body = visible part of the page (e.g. paragraphs, tables, headings)

# NOVELTIES & OUTLOOK

- Structuring: <details>, <summary>
- Multimedia: <video>
- Interactivity: <canvas>
- HTML 5.3 Working Draft (18th of October 2018)
  - Payment Request API
  - Accessible Rich Internet Applications
  - Content Security Policy

The image features a blue gradient background with white circuit-like lines in the corners. These lines consist of straight segments and small circles, resembling a stylized electronic circuit or data paths. They are located in the top-left, top-right, bottom-left, and bottom-right corners.
